We invite you to apply as a 

STUDENT ASSISTANT 

(19 hours/week)

Key requirements

- Good knowledge of applied economic research methods and econometrics
- Advanced knowledge of Stata statistical software (experience with R and/or Python will be an advantage)
- Readiness to acquire necessary technical skills
- Ability to work independently and responsibly

Job description

- Support of the current research in the field of Development Economics and Migration
- Data collection and econometric analyses in Stata software
- Scientific literature search

What we offer

- Interesting insights into the work of an international economic research institute
- Experience in empirical economic research and the use of „real-life“ data
- Flexible working hours and good pay

Other valuable qualifications

- Interest in Development, Migration and Labor Economics
- Work experience on a research assistant position

The Institute

IZA is a bridge builder for research in labor economics. We narrow the distance between science and society, and transport relevant knowledge about the working world to the general public, political actors and economic players. IZA is the hub of a global network of scholars who work with us to create a sound economic understanding of how labor markets work and how labor market policies perform. We contribute to the future of labor research by supporting young scholars on their paths to becoming tomorrow's leading academics.
